PIPE GUARDS

Protection for Your Expensive Pipe

Our dirt bike exhaust pipe guards are manufactured using a hand laid mix of carbon, kevlar and our unique high-temperature resistant resins. A total of 5 layers to be exact. This combination creates good looking, durable and clean fitting guards that will protect your expansion chamber from power robbing dents and dings.

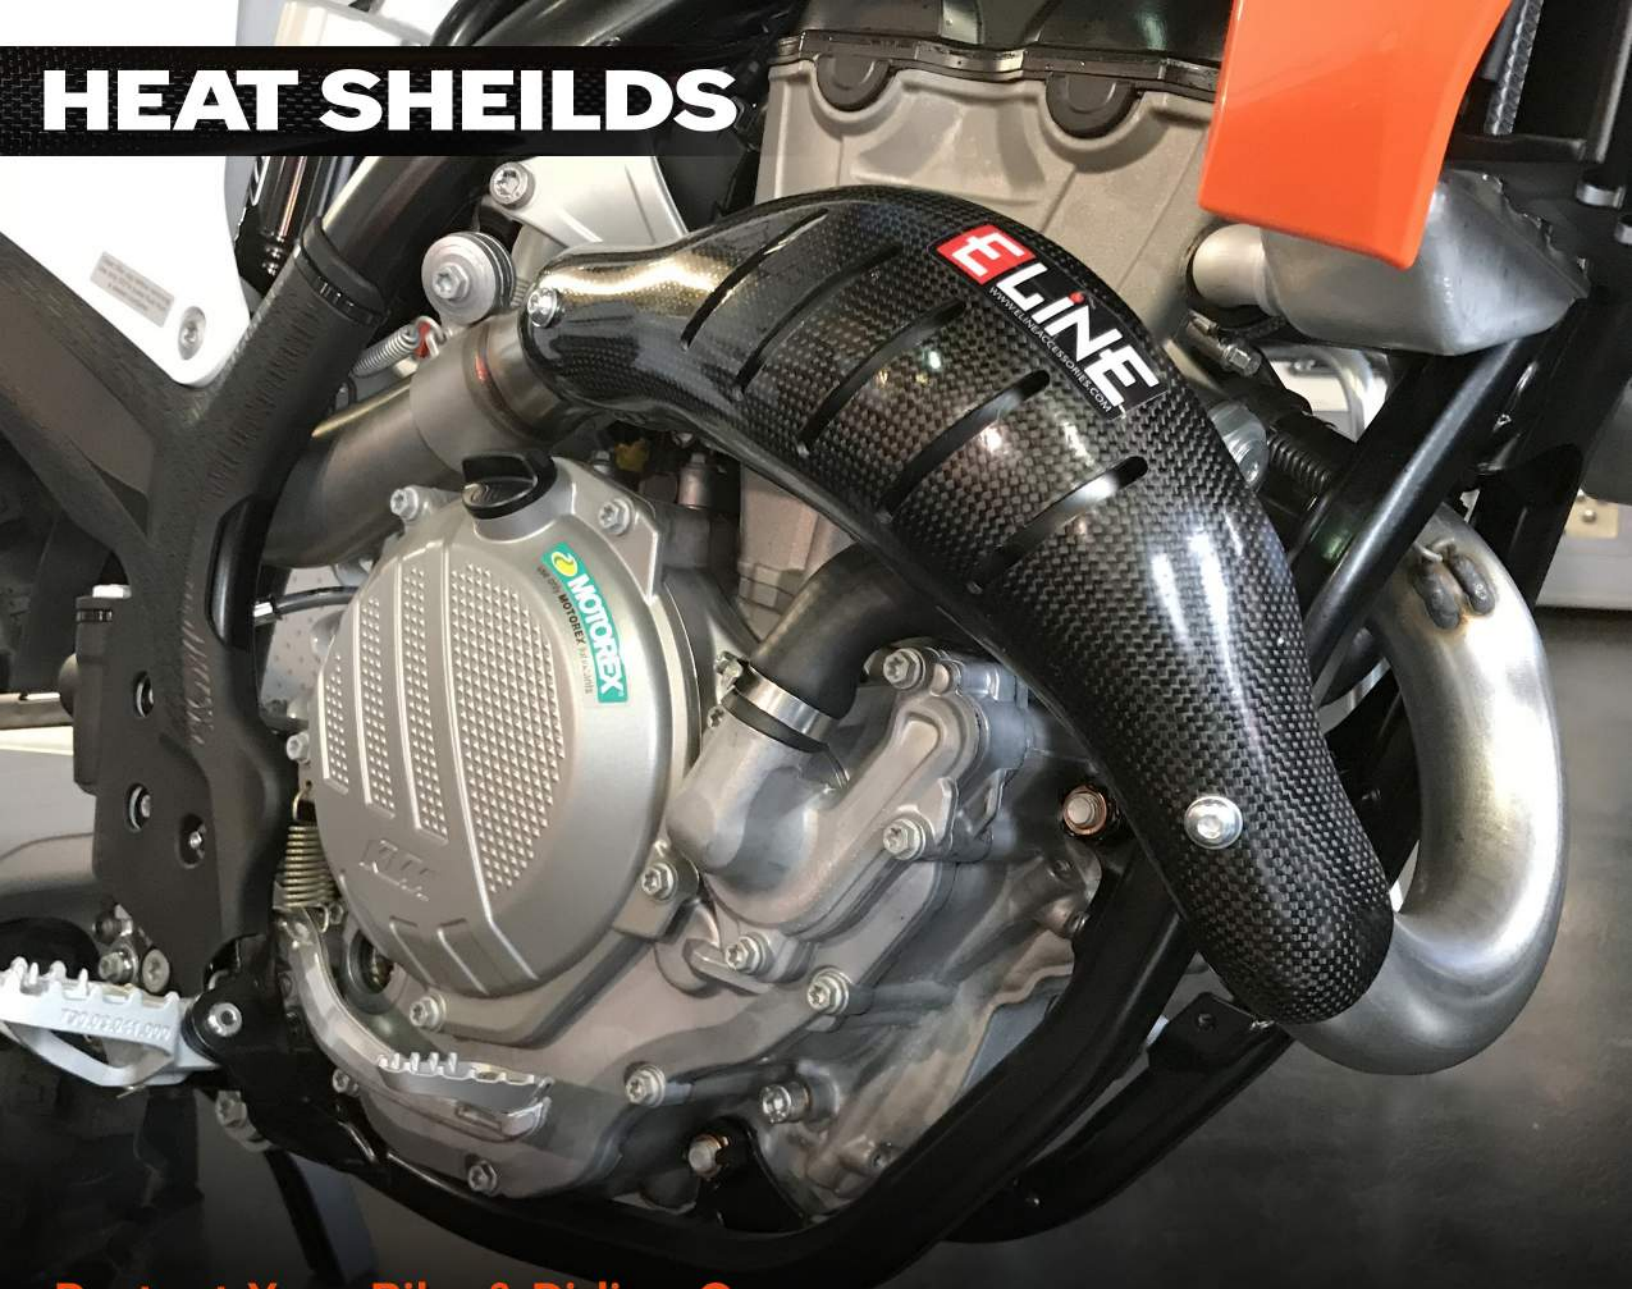

Compared to other exhaust pipe guards, the E Line Accessories carbon fiber pipe guard is lighter and more durable with a 75-percent greater tensile strength from any of the metal units we have tested. It is "real carbon fiber." Our carbon/kevlar components are designed to be installed in a matter of minutes without removing the exhaust. A pair of stainless steel clamps are all that is needed to add durable, lightweight protection to the expansion chamber of your favorite motorcycle.

You can find our 2-stroke exhaust pipe guards for almost every major brand of dirt bike. Just reference our fitment guide listing in the back of this catalog.

E LINE

HEAT SHEILDS

Protect Your Bike & Riding Gear

If you own a four-stroke then you owe it to yourself to provide the added protection of an E Line Accessories carbon fiber exhaust shield for your precious header. Whether you have an OEM or aftermarket exhaust system, the head pipe is susceptible to dings and dents as it gets hot so it is critical to protect it from potential impact damage. With temperatures exceeding 900-degrees Fahrenheit on most dirt bikes, your riding gear can be burnt quickly if it contacts an unprotected header.

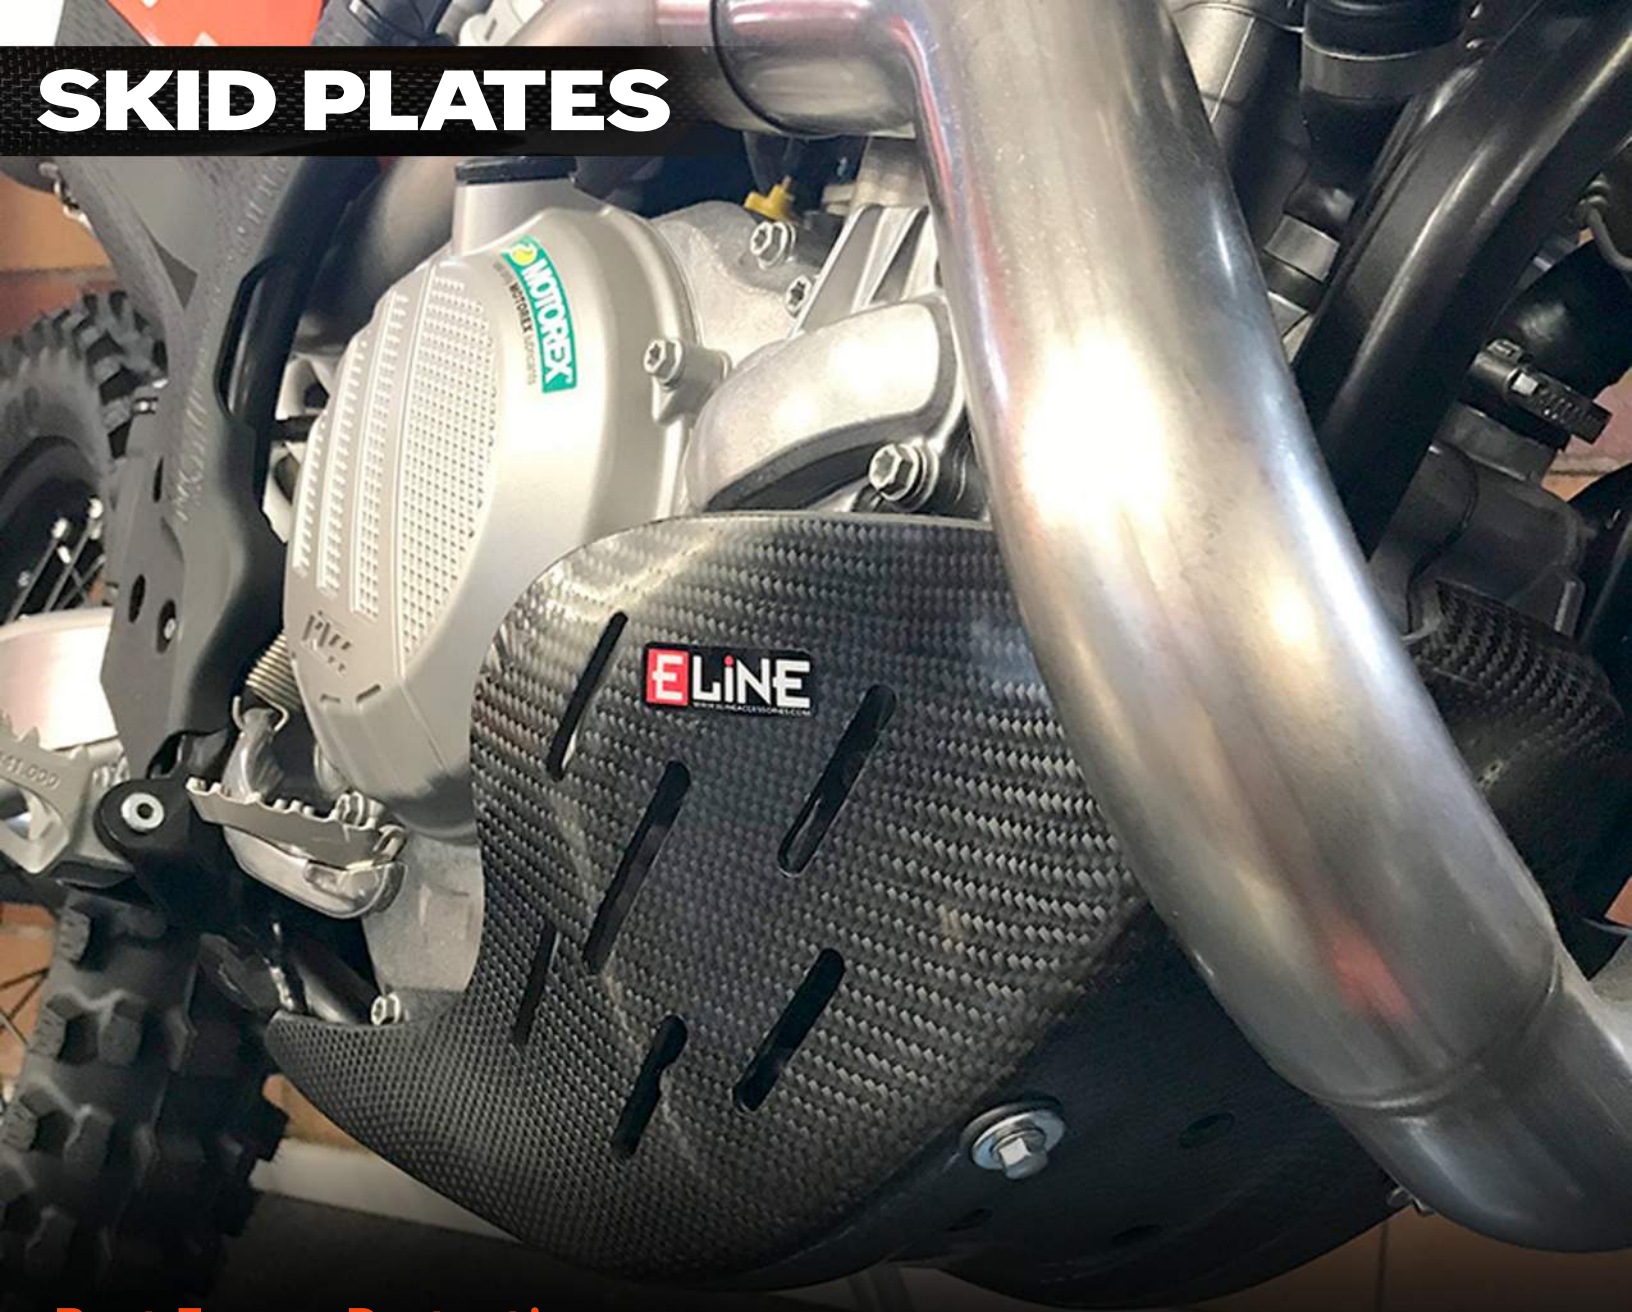

E Line Accessories dirt bike heat shields are designed to attach to the stock header bolt-on tabs so they are easy to install, but they do require a specific mounting kit that includes all the necessary hardware and instructions. Each kit features stainless steel mounting hardware that provides an exact fit that keeps the carbon heat shield the perfect distance away from the head pipe it is protecting. This type of attention to detail is part of what sets our components apart from the crowd.

Explore E Line Accessories series of carbon fiber exhaust heat shields. Check the bike fitment chart in the back for your ride.

E LINE

SKID PLATES

Best Frame Protection

There is not a better way to protect the bottom of your motorcycle frame and engine than a Carbon/Kevlar Composite dirt bike skid plate from E Line Accessories. Our motorcycle skid plates are hand molded to the exact shape of the frame and engine which in turn offers much more protection from the constant pounding that occurs when riding off-road.

We incorporate Kevlar into our carbon fiber skid plates because it has proven to be one of the most durable and lightweight materials on the market today. While the carbon fiber looks great, the Kevlar helps set E Line Accessories from the competition. Why carbon fiber? Because an aluminum skid plate cannot be molded perfectly to the shape of the bike. Also, metal is prone to dents and bending which can allow impacts to cause damage along the lower frame tubes. Plastic? Great idea, however plastic will allow frames to be bent on impact as well as never being formed to follow the engine and frame lines to eliminate mud build up.

E Line Accessories carries skid plates for many models of dirt bikes. Bike fitment chart at the end of the catalog.

E LINE

DISC GUARDS

Extreme Disc Protection

This carbon fiber disc guard is "extreme"! We took the time to manufacture additional Kevlar into the front area of the rotor guard for additional rock protection. Our one piece bracket adds to the extreme application as well.

Our goal at E Line Accessories is to develop, test, then manufacture the world's most premium carbon fiber composite off-road disc guards available. We pride ourselves on the best fit and finish products for your enjoyment, PERIOD!

Explore E Line Accessories for carbon fiber disc guards on the fitment chart.

LINKAGE GUARDS

NEW! ELine Dirt Bike Linkage Guard is an optional addition to our linkage model skid plates.

Easily installs for a great fit onto your ELine carbon fiber skid plate for additional protection of your expensive dirt bike linkage.

REGISTRATION WRAP

Eline's registration wrap is a universal fit on all forks after 2000. This is a carbon fiber wrap that can be snapped on any bike without any tools. It also can protect registration with the option of positioning on the fork tube.

FORK GUARDS

Carbon Fiber Fork Guards from ELine protect your easily damaged upper fork tubes from rock chips and dings that occur while trail riding or racing. Let our good looking, lightweight universal fit dirt bike fork guards take the abuse while they keep your OEM fork in new condition while you focus on riding the track or trail. ELine incorporates an abrasion resistant epoxy into their carbon fiber fork guards which increases durability and keeps them looking great.

Universal carbon fiber upper fork protection. Fits all makes and models.

ADVENTURE BIKES

Luggage Guards & Heat Shields

E Line Accessories is now designing high quality carbon fiber products for Adventure Bikes. Protect your adventure bike saddle bags from damaging exhaust heat. Mount the E Line carbon fiber heat shield/guard on your new KTM 790 or 890 for some much needed lightweight protection. This carbon fiber guard is sleek and stylish protection for your KTM 790 and also fits the new 890 Adventure R.

E Line Accessories has exhaust protection for all your long motorcycle adventures. Check out our guards for KTM 350/500 as well as the 690.

Explore E Line Accessories series of carbon fiber exhaust heat shields. Find guards for your bike on the chart at the end of the catalog.
